Scripting In 2005, 3D Studio MAX introduced scripting support for users of Mac OS X and Linux. This was based on the implementation of a scripting engine in the MAXScript programming language. AutoCAD Torrent Download is not the only program that can generate 3D models for 3D printing. Some versions of AutoCAD can be upgraded to enable 3D printing. In 2016, Microsoft released a plugin named ObjectARX API for AutoCAD that allowed users to import and export DXF files without requiring the use of AutoCAD. Q: How to control data encoding for DateTimeString I have a big block of code with some really messy dates. It doesn't look like it's working, since they are all blank. DateTime dt; dt = SomeDate(); // "1/3/1980 0:00" //dt = SomeOtherDate(); // "" I understand that a DateTime string can not store dates other than the Unix epoch, but I expected that to be a limitation of DateTimeString, not the DateTime. I'm running out of time to try this out on a production system, so my question is this: Is there a way to make it store the date as well as time in it's string representation? Or is there some other DateTime method I can use to get around this issue? A: You can use the ParseExact or TryParseExact method, the parameters are similar to Convert.ToDateTime, except that it doesn't enforce the "only valid date/time values for the current culture". var dateTimeString = "1/3/1980 0:00"; var result = DateTime.ParseExact(dateTimeString, "d/M/yyyy hh:mm", CultureInfo.InvariantCulture); Another option is to format the string using a CultureInfo object, and then parse that formatted string with DateTime.ParseExact. var format = "d/M/yyyy hh:mm"; var ci = CultureInfo.InvariantCulture; var result = DateTime.ParseExact(dateTimeString, format, ci); If this is your first visit, be sure to check out the FAQ by clicking the link above. I'm not trying to be funny, but I just wanted to point out that in many of those photos, they look like fake logos. Its not like the other guy has a real Biohazard logo on there shirt or hat. Also, the red bibs. What is that? Its not a nod to anything in particular, it just looks really weird. I agree about the fans. I think he just had a
