## **How To Hack The Windows 7 Or Vista Passwords-Become A Hacker**

[Download](#)

---

If you can't get into safe mode, I'm afraid you'll have to create a password reset disk using a CD or USB stick as follows. Otherwise, the reinstall will be yours. Insert the CD into the drive. It may only be a Windows disc, or it may require an OS X or Mac OS X disc. Follow the on-screen instructions to open the BIOS (see "What is a BIOS?"). This can be difficult, but it usually includes a boot selection mode. (You may see this screen if you set your computer as a device in Windows and then try to enter the BIOS using the DEL command.) Insert the disc into the optical drive and enter the `chkdsk` command.
