What's New in the?

 The application displays the forecast and current weather conditions for the next five days. You may specify a location to start checking out weather data for a specific location. The application lets you set up alarms and specify the minimum and maximum values for the weather data. You are allowed to check out the weather details for the nearby locations.

 The application presents the ability to check out the maps for the nearby locations. Weather Exchange lets you save favorite locations for easier access.

 You are able to access a local radar.

 A weather forecast is displayed along with information about the temperature, humidity, dew point, barometer pressure, rain rate, wind speed, wind gust, and wind direction.

 The weather details for the current and future days are updated manually.

 You can set the units of measurement for the display of temperature, wind speed, and distance.

 You are allowed to select the date and time format.

 Weather Exchange is not supported on Windows XP and Windows Server 2003.

 Free trial version allows you to download and view the history of forecasts for five days.
