Integrated Mapping: Draw on the latest high-resolution imagery using integrated mapping tools, including ortho, azimuthal, and imagery satellite view tools. Deep 3D Editing: Use LiveSketch to quickly paint and edit 3D geometry. Bring it into any layer and dimension or color it any way you want. 3D Preview: Have any AutoCAD model or drawing open in the browser to show exactly how it would look in 3D. New Task Panels: Simple, powerful toolbars with a new look and functionality. New task and management toolbars combine and streamline existing tools into new panels.
