The setting of the game is the Lands Between, a vast world where the Elden Ring Activation Code has been shattered. The world of the Lands Between is divided into areas known as lands, and each land is ruled by an Elden Lord. Players begin the game with their characters in the Guild City. From there, players can freely explore the world of the Lands Between, up to a certain point in time. This world is full of monsters, monsters, and monsters. Online play allows you to meet, team up, or compete with other players. Using the new guild chat feature, you can talk with other players in real time. It's a great way to get to know other players and form teams! Players create their own personal worlds, called worlds, and manage them in the world management section. Battle system: One of the most decisive elements in combat. You can freely switch your combos, without having to tap the button. "Sword Style" is the comprehensive system for accurately applying Swords to enemies in close combat. Use "Rage" to unleash additional effects or techniques. By leveling up, your "Rage" accumulates and you can deal damage at an even greater rate. Fight Skill "Single Man Strategy" is a simple and easy to understand play style in which you mainly attack until the end of a battle. Battle system "Sword Art Online: Lost Song" is an action RPG battle system in which you can

select your attacks or special abilities.

Gameplay: "Sword Style": When selecting the attack, there are two methods of operation.

Double Attack (Up Down) A single attack can be performed by pressing the button. The Sword Art Online attack or special attack can also be performed by pressing the button. It can be performed any number of times to increase the damage.

Single Attack (Left Right) Press the button to perform a single attack, which increases the damage. By pressing the button for a certain amount of time, you can activate a skill. - If the skill has an effect on the next attack, a button will be displayed below the last attack. - It is possible to select and confirm a skill at that time.

"Selection Guard" When an attack is performed, a button will be displayed. Only one button can be selected at a time. After selecting a button, you can confirm the selection by pressing the button again.

"Rage" The character's Rage builds up based on the number of times that you attack an enemy.
