Inventory in the Kitchen The Challenge of the Floating Crocodile The Mission of the Temple BellsBy Vadim Pushkarev for Coinidol.com Cryptocurrency exchange HitBTC has begun trading of bitcoin cash and litecoin on its website. “We welcome our new users to HitBTC. We have developed a new trading platform and are now ready to serve the crypto community. These two cryptocurrencies can be traded on our platform. Users can follow the trading here to learn more about trading”, said HitBTC. The company warned that the wallets had been synchronized “from a backup we made in March”. Users are informed to have their funds in both their wallets and know their private keys. Bitcoin cash is currently trading at \$1,731 with a market cap of \$5.82 billion. The coin has seen a near 60% decrease in price from it’s all-time high of \$3,500. Bitcoin cash has long been discussed by traders as a new high-risk/high-reward market. It is not the first time cryptocurrency exchange HitBTC has added new cryptocurrencies to its list of available assets. Last week HitBTC started trading Ethereum and will soon add Stellar Lumens and Ripple. Litecoin is currently trading at \$29.41 with a market cap of \$1.87 billion. The coin has seen a 35% rise in price from it’s all time low of \$13 and a 5-fold increase on the spot exchange since it’s all-time high. This is not HitBTC’s first decision to add crypto-currencies to its exchange. Earlier in the year the exchange unveiled their partnership with ShapeShift.io, a decentralized exchange, to let users convert cryptocurrencies to fiat before withdrawing or depositing money. This is also not the first time a bitcoin cash has been “promoted” by both Ethereum and Litecoin. In January, the Litecoin Foundation’s head of communication, David Bird, announced that the Foundation was going to change it’s community from Ethereum to Litecoin. The token was called “YOUR LITECOIN” and any community members holding it received dividends. Litecoin will not be the only altcoin to suffer. After a public debate about pumping coins, Onecoin appeared to have gone

What's new:

By Patrick Koehler, Part I December 2013 (Posted to BBC News, December 21, 2013) Article continues below The "Small Wars" series continues on BBC News with three more installments highlighting Part II: a 20th-century narrative of "small wars" between small nations... PART I: Introduction: Soldiers: Sticks against Stones and their Metal Weapons The Orientation On arriving at Fort Mims in the Alabama National Forest, near the small town of Brandon, at the edge of the Chattahoochee river in the middle of the 19th century, the first thing that caught my attention were the soldiers. There were some well-shaped sticks, just like the sticks of the sticks and stones that I grew up with in the mining districts of what is now Cumberland, home of so much stone that has led to this article's title, "The Stick and the Stone" (see No. 62). And there were big sticks, perfectly formed and sturdy like the huge stick of the Cherokee warrior Forney (see No. 66). There were the shorter lengths, as well as the longer but stooped-to-the-ground, as used for carrying food and blankets and boots up the mountains. And finally, there were the sticks that hugged the mountain slopes. The Stone There were the rocks. They could weigh 250 lbs. or more. They could measure 20 feet or more across and could weigh upwards of two tons. They were heavy enough to be the cause of death, yet were small enough to be a rock that could be easily thrown by a child or small animal. These were not the big-fisted, clawed, and dirty rocks that could not hold a mattock or pick. These were smooth rocks with rounded edges, but they had the strength to be a lethal weapon given to a child or a smaller animal. In the 1820s, the light-skinned Creek Indian known to the white pioneers as 'Kingfish' pushed out of the Appalachian Basin to Old Milledgeville and Amherst, where the Creek led a semi-permanent existence as squatters on lands of the Treaty of Old Milledgeville on lands the U.S. government was leasing through the U.S. Indian Office. While the First Seminoles, with their light complexions, style of dress and moccasins and their overall grace and style of living, may not have been impressed
